

Hydraulic Power Units for Crumb Rubber Balers

Each of International Baler Corporation's Rubber Crumb Balers includes a regenerative self-contained hydraulic unit. These units may be customized to run a set of balers or even multiple units with a single hydraulic tank. IBC excels at customization, and our power units are no exception. Special valving, piping, voltage, sound-proof enclosures, and hazardous area requirements are just some of the options IBC can provide to meet your specification.

IBC is a worldwide leading manufacturer of innovative crumb rubber balers and scales. Our engineering and project management is done in-house to provide one point of contact, accurate project specification compliance, and customer satisfaction.

FEATURES:

- Motors and Pumps
- All necessary Hydraulic Valves
- Pressure Test Points
- Low Oil Level/High Oil Temp. Switch
- Two Tank Clean-out Ports
- Closed-Loop Cooling and Filtration
- All Junction Boxes are NEMA 12
(NEMA 4 or NEMA 4X optional)
